SIM Safety Sydney #77

SIM Safety Sydney #77

IN THE EVENT OF FIRE

Use the RED extinguisher located near the entry door on the left hand side of the cabin in the cupboard.

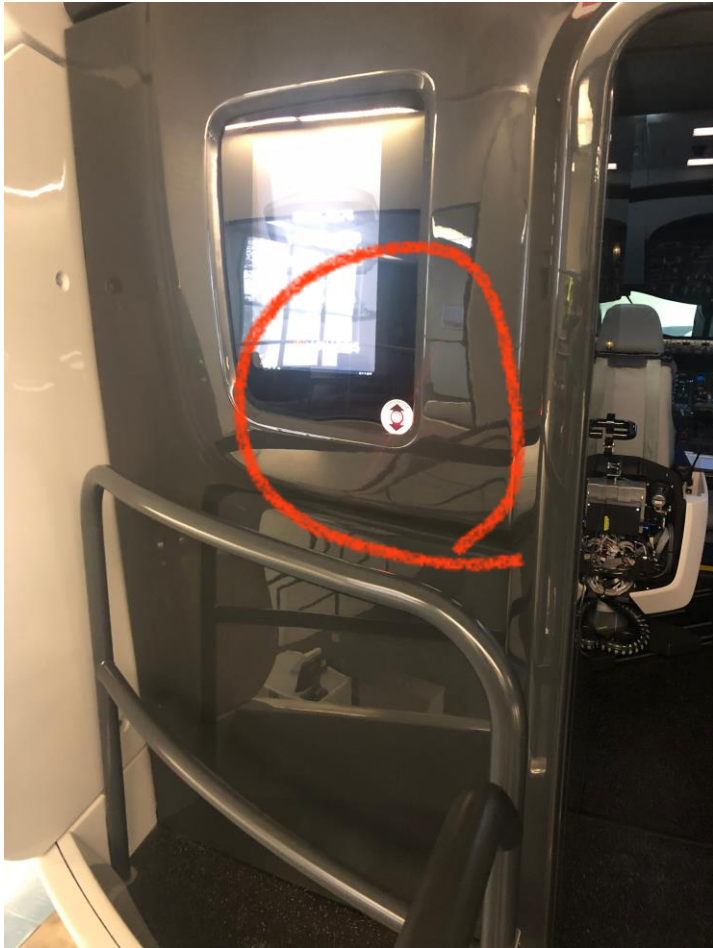

SIM Safety Sydney #77

If the door is jammed or if you are unable to locate the door handle (smoke or darkness), use the emergency exit.

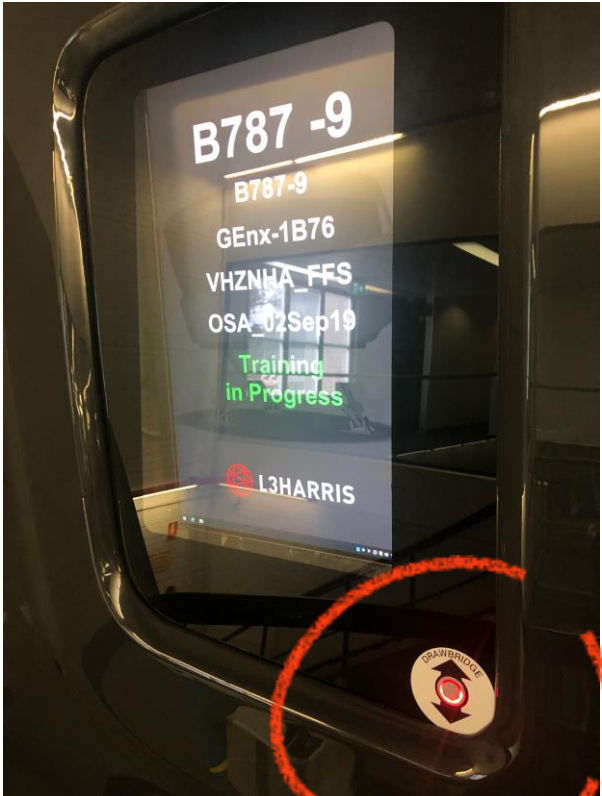

Kick the panel clear.

SIM Safety Sydney #77

If the ramp does not operate following selection of “MOTION OFF” use ramp controls on left rear exterior and select arrow down
(Additional ramp controls are located on the access bridge)

SIM Safety Sydney #77

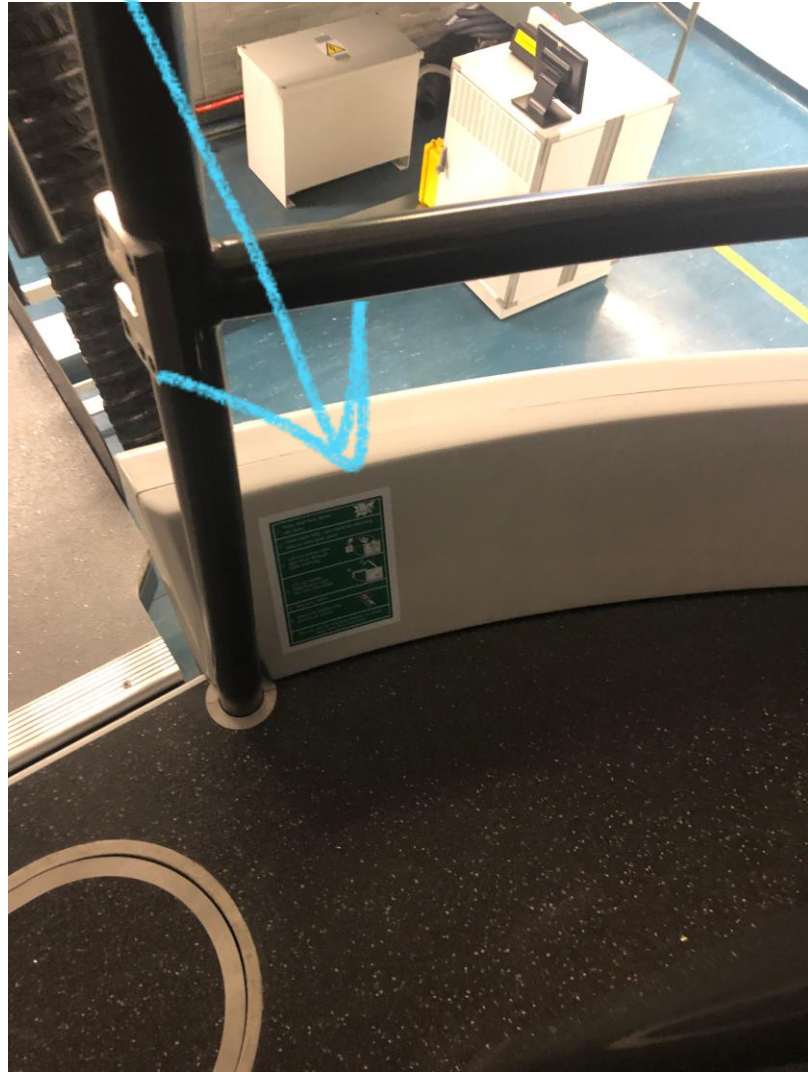

In the event of fire and ramp will not lower, use the escape ladder located in the floor a

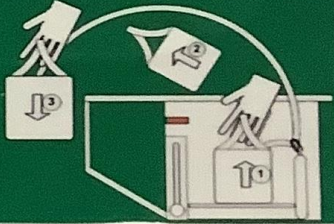

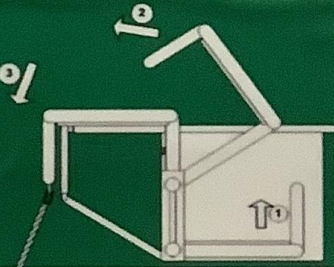

SIM Safety Sydney #77

Escape ladder stowage.

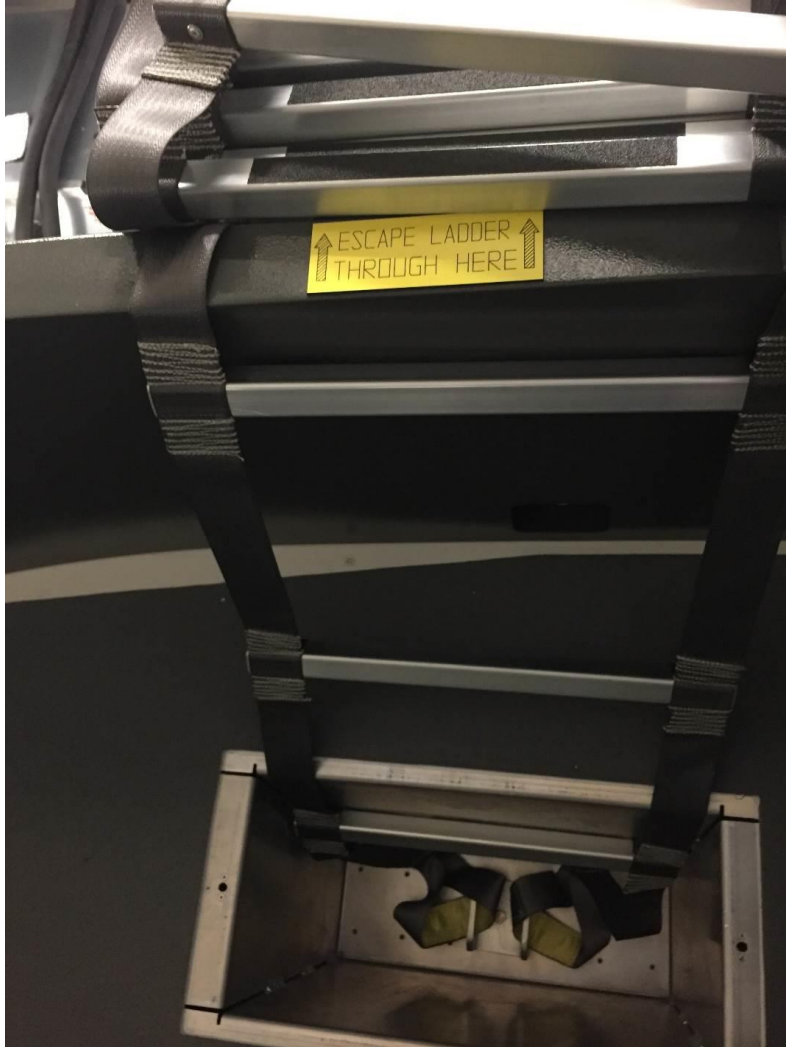

Instructions located at RHS on exiting cabin

- 1 Push and hold down red lever 
- 2 Open gate fully, use handrail retaining stay to hold gate open
- 3 Lift out ladder box and drop through gate opening 
- 4 Lift up ladder attachment and flip over the edge 
- 5 Replace hatch
- 6 Descend ladder one person at a time 

Do not use the Escape Ladder to climb back onto the Simulator

SIM Safety Sydney #77

Ladder being deployed.
Door must be open

- Handrail retaining stay.

SIM Safety Sydney #77

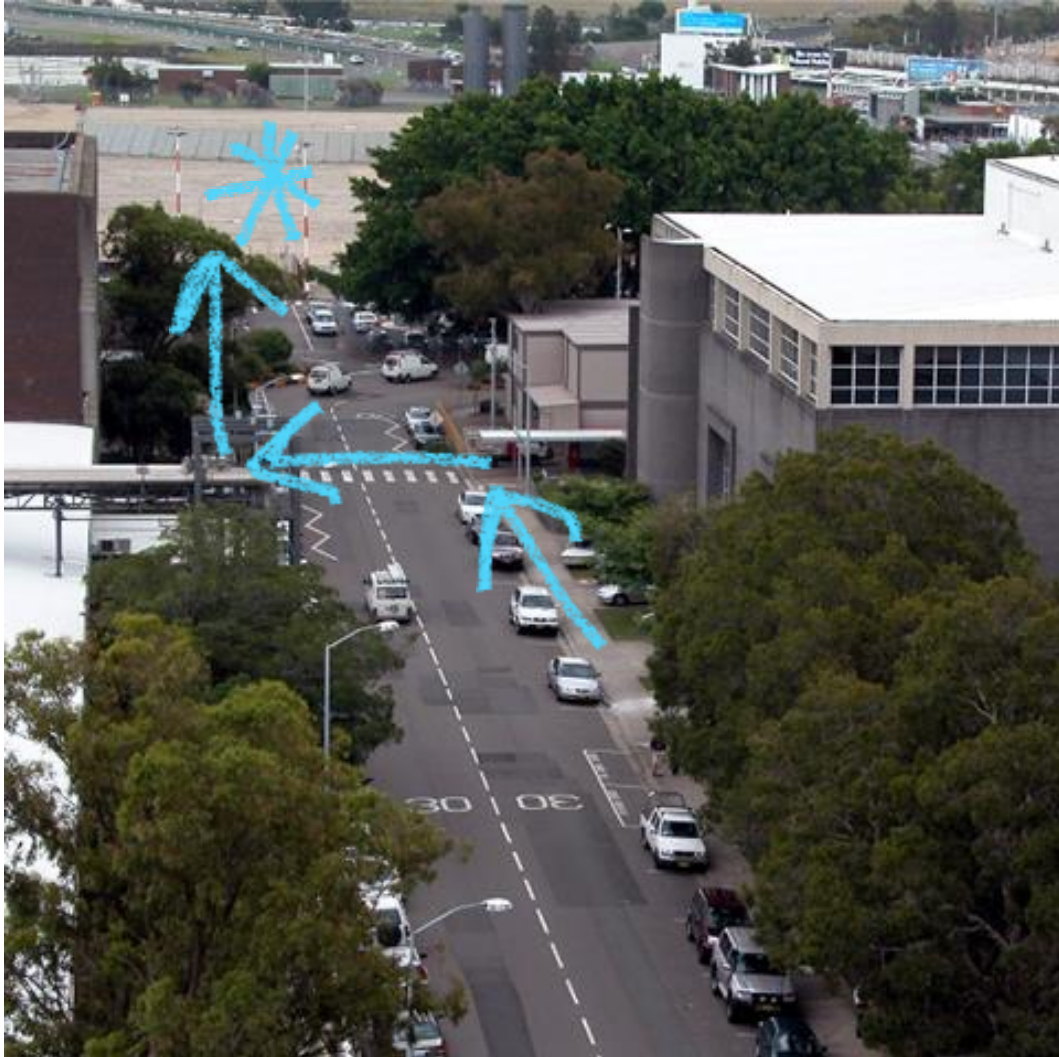

After walking down the stairs or climbing down the ladder, vacate via one of the two exit doors.

The exit doors are located in the NE, S corners of the simulator bay.

SIM Safety Sydney #77

If necessary evacuate the building via the most suitable exit.
